### Bag - Tips and Hints

### Preparations

Draw a circle the size desired for your finished bag. Divide the circle in two. Draw a second half circle inside the first one to create the handle pattern.

Select 2 - 4 coordinating fabrics such as silk, velvet, leather, etc. for your bag. For best results use fabrics of similar weight.

### Bag front

Decorate your fabric pieces and then cut according to your pattern.

Make the decorative flower using the template that comes with the circular attachment\*. Select the decorative stitch of your choice; we used 5.1.8.

Use fusible web to attach the flower to the bag and sew it in place using a dense zigzag stitch.

Add parallel lines of stitching that echo the flower using the Clear ¼ Inch Quilting foot for IDT™ System (820926096)\*.

### Other embellishments

Use one of the built-in alphabets and a decorative stitch to make your own name tag. We used the Comic alphabet and stitch 4.2.11.

Create a tassel for the bag using a square of leather. Cut slits 5mm apart as shown in the illustration to fringe the leather.

### Assembly

Apply fusible batting to all parts of the bag before assembly. Piping made from a coordinating fabric provides the perfect finishing touch. For best results, use the Piping foot (820532096).\*

\* See the PFAFF® Accessory Catalog for more information.
